Blk 2 Lot 89 Phase 1E Kasiglahan Village, San Jose, Rodriguez, Rizal

WORK EXPERIENCE

GT Straktura
2017 - 2018

Autocad Operator

Produce detailed 2D and 3D drawings based on specifications provided by engineers, architects, or designers. These drawings may include plans for buildings, mechanical parts, electrical systems, and more.

**Municipality of
Rodriguez Rizal**
2022 - 2025

Web Developer & IT Staff

- We create dynamic and interactive websites, web applications or systems using PHP (Laravel). One of our works are HRIMS, Ticketing System and Bagong Montalban App. As the server-side scripting language. We also work with front-end technologies like HTML, CSS, and JavaScript.
- Help customers or end-users troubleshoot issues with software, web applications, or services. We respond to inquiries via email, chat, or ticketing systems.

**Elevate Solution
Experts**
2025 - Present

Python Web Developer

- As a Python Web Developer, I designed and developed web applications using frameworks such as Django and Flask, implemented server-side logic, and created secure and efficient APIs to support front-end functionality. I managed databases, optimized queries for performance, and deployed applications to cloud platforms. My role also included testing, debugging, and documenting code, as well as collaborating with team members and clients to deliver scalable and user-friendly web solutions.

WORK EXPERIENCE (AS FREELANCER)

Titan Tech.
2023 (July - December)

Front-End Developer & Tester

At Titan Technology Company, I worked as a front-end developer using Angular for building dynamic and responsive web applications. My role involved creating user interfaces and ensuring seamless interaction with backend services. Additionally, I served as an application tester, where I was responsible for identifying and fixing UI bugs, testing functionality, and ensuring overall product quality before deployment.

Amol Malankar Inc.
(Overseas)
2024 (January - May)

Python (PyQT) Developer (PIANOGOD DESKTOP APP)

The PianoGod app is a music learning platform where users can practice piano using AI-assisted tools. As the system developer, I handle backend development using Python, focusing on integrating AI for real-time feedback, tracking user progress, and improving overall performance through data analysis. My role also includes optimizing the app’s performance and ensuring a smooth user experience.

Plaridel Products and Services
2024 (July - October)

Web Developer (Wordpress)

As a web developer at Plaridel Products and Services, I built their e-commerce website using WordPress. My role involved designing and customizing the site to create a user-friendly shopping experience, integrating payment gateways, product catalogs, and ensuring smooth navigation. I also optimized the website for performance and mobile responsiveness to enhance customer engagement and sales.

EDUCATION

Colegio de Montalban
2014 - 2019

Bachelor of Science in Computer Engineering

I graduated from Colegio de Montalban with a degree in Bachelor of Science in Computer Engineering. My education provided me with a strong foundation in both hardware and software development, equipping me with the skills needed for system design, programming, and problem-solving in various tech-related projects.

HARD SKILLS

Web Development

Frontend

- Vue.js
- HTML
- Css
- Java Script

Backend

- PHP (Laravel)
- Python (Django, PyQt)
- Node

Mobile App Development

- React.js
- React native

Tools

- Expo
- Xcode
- Android Studio

SOFT SKILLS

- Team Player
- Fast Learner
- Problem Solving
- Leadership
- Adaptability
- Work Ethic
- Communication Skills
