

JOHN HELBOY OZARRAGA

MID-LEVEL BACKEND DEVELOPER | PYTHON | DJANGO | REST APIs

+63 945 743 1982 • ozarragahelboy@gmail.com • Rizal, Philippines

PROFESSIONAL SUMMARY

Mid-Level Backend Developer with almost 5 years of professional software development experience, primarily focused on Python and Django. Experienced in building REST APIs, designing and managing relational databases, integrating third-party services, debugging production issues, and maintaining reliable applications. Hands-on experience with Django REST Framework, Flask, FastAPI, PostgreSQL, MySQL, SQLite, AWS EC2, RDS, S3, IAM, CI/CD, and cloud deployments. Also experienced with React, React Native, TensorFlow, and AI-integrated applications. Comfortable owning backend features, working independently, collaborating across the stack, and contributing to system architecture.

PROFESSIONAL EXPERIENCE

FULL STACK ENGINEER — ALMA LLC

Nov 2025 – Sep 2026

- Developed and maintained Mentra, an AI-integrated training and development platform designed to support VA employees.
- Built and maintained backend features and APIs using Python/Django, including application logic, data handling, and service integrations.
- Worked across backend and frontend requirements, contributing to full-stack features and troubleshooting application issues.
- Implemented and improved features based on project requirements while maintaining existing functionality and system reliability.
- Contributed to technical decisions, debugging, and continuous improvement of the application architecture.

PYTHON DEVELOPER — Elevate Solutions

Jan 2025 – Jan 2026

- Developed business applications for different client requirements, including restaurant and education-related applications.
- Worked on EchoVQ, an AI-integrated musical education application designed to support music students as an AI-assisted third teacher.
- Implemented backend functionality, APIs, database operations, and integrations required by application features.
- Worked with audio/music-related processing and AI functionality, including voice-generation concepts for teacher-style learning experiences.
- Maintained and enhanced existing systems while debugging issues and delivering project-based features.

PYTHON DEVELOPER — Municipality of Rodriguez, Rizal

Jul 2021 – Dec 2024

- Developed applications intended to improve access to municipal services and communication for residents.
- Contributed to the Bagong Montalban mobile application for municipal information and services.
- Worked on Juan Toda, a delivery-related application, and a 911 emergency application.
- Designed and implemented backend functionality, database operations, APIs, and integrations for public-service applications.
- Supported application maintenance, debugging, feature development, and improvements based on operational requirements.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, Flask, FastAPI, REST APIs

Frontend / Mobile: React.js, React Native, Expo, HTML, Tailwind CSS

Databases: PostgreSQL, MySQL, SQLite, SQL, Database Design

Cloud / DevOps: AWS EC2, RDS, S3, IAM, CI/CD, Linux, Git, Deployment

AI / Data: TensorFlow, AI Integrations, Audio Processing, Algorithms & Data Structures

Architecture: Software Architecture, API Design, Service Integration, Debugging, System Maintenance

SELECTED PROJECTS

Mentra — AI-integrated training and development platform for VA employees; backend and full-stack development using Python/Django with API, database, and service integration work.

EchoVQ — AI-integrated musical education platform featuring voice-generation capabilities and audio/music learning workflows.

Bagong Montalban App — Municipal mobile application developed to help residents access information and connect with local services.

Juan Toda / 911 Applications — Public-service applications supporting delivery-related workflows and emergency response access.

B-SMIS — Django + React + React Native system for information and administrative workflows, using PostgreSQL.

Campusloop / School Management Platform — School-focused platform concept covering registrar workflows, learning management, student/teacher/cashier modules, and related services.

EDUCATION

Bachelor of Science in Computer Engineering — Colegio de Montalban | Sep 2015 – Oct 2019

ADDITIONAL INFORMATION

Target Role: Backend Developer / Python Developer / Full Stack Engineer

Availability: Available for full-time, fully remote opportunities
